

PROJECTS**AI Integrated Express API** (01/2026 - 03/2026)

Built a Node.js/Express API for WhatsApp-based loan customer engagement with multiple WhatsApp profiles(Service/marketing/support) with modular routing and AI services(Gemini, Ollama, OpenAi) for chat handling, message persistence, and webhook audit logging.

Notes Website (10/2025 - 10/2025)- [link](#)

A note taking website available on any device. It has authentication, authorization, cookie, and reset password functionality. Built with security and optimization in mind. Security includes Middleware, RLS, session-based cookies, input validation, SQL injection protection, auto-deletion of notes when a user is deleted, and server failure warnings. Tech stack: React.js, DaisyUI, TypeScript, Express.js, and Supabase.

Workflow Maker (03/2023 - 03/2023)- [link](#)

Developing an interactive Workflow Builder using React Flow with dynamic node linking and drag-and-drop functionality for internal process visualization.

Fruit-cream Business Website (10/2025 - 10/2025)- [link](#)

Developed a website for fruit-cream seller. From planning to development, I handled the entire process end-to-end. Increased visibility of brand with help of SEO optimization, Page performance tuning, Google Search Console analytics, Sitemap setup.

Portfolio website- [link](#)**EXPERTISE****Full Stack Developer**

Gurgaon, Haryana | Feb,2025 – present
